	<u>CORRIGENDUM No. 3, DATED 01.12.2023</u> SUPPLY OF WET STRENGTH RESIN (EPICHOLORO – HYDRIN BASED POLY AMIDE RESIN) AT BNPM PLANT, MYSURU	

CORRIGENDUM No. 3, DATED 01.12.2023

FOR

E-TENDER NO. BNPM/NCB/343/2023-24 dated 25.10.2023

1.0 SCOPE OF THIS CORRIGENDUM

This corrigendum dated 01.12.2023 is issued for:

Sl No.	Tender Clause	Previous Provision	Amendment/Action/ Clarification incorporated in this corrigendum
i.	Section-VII, Technical specification point no.7, Performance Criteria	A. It should not form any Coating in Master Vat and Approach flow system pipelines. There should not be any machine downtime to clean the deposits in Master Vat and Approach flow system pipelines in between two boil outs. i.e. min 21 days. If downtime occurred for cleaning the WSR coating the performance amount will be deducted	A. It should not form any Coating in Master Vat and Approach flow system pipelines. There should not be any machine downtime to clean the deposits in Master Vat and Approach flow system pipelines in between two boil outs. i.e. min 21 days. If downtime occurred for cleaning the WSR coating the performance amount will be deducted completely. B. The mould cover life should produce more than 800MT of paper. If Mould cover life is less than 800 MT, due to wear and tear with respect to WSR reaction with mould cover,
